

# How do I use Party Powder?

## What do I do with the powder?

- ✚ The main objective is to throw the powder upwards into the air to form colourful clouds of vibrant colours Or throw it at each other – avoiding the face area unless you're all wearing facial protective gear ie; Sunglasses and / or Mouth Mask

## How do I open the powder packet?

- ✚ The powder bags can be opened by tearing across the top sides off the upper part of the packaging where the incision is located (No scissors required)

## How do I use it?

*There are a few ways of dispersing the powder*

1. *By hand:* Pour small amounts of powder in the palm of your hands or scoop directly from the packet
2. *Squeeze bottles:* are a great way of controlling how much you're dispersing each time
3. *Mini plastic cups:* that are firm enough to hold small amounts of powder at a time, this is ideal for kids parties
4. *Photo Shoots:* Slightly dampen the powder with water and use to smear on face, arms, hands etc... using either your fingers or a silicone sponge. Ideal for photo shoots (but not limited to)  
This achieves deep vibrant colours

### Note:
